There have also been a lot more 12 volt lights installed, in the showers, outside areas, over the barby, etc. If there are not a lot of campers and there is sufficient refrigeration for everyone, the generator only needs to be run for a couple of hours a day to top up the water tank and also top up the batteries. If any of the fridges aren't being used, can you please turn them off at the power point to conserve battery power. The instructions for turning on and off the generator are in the shed.
